## KASTHAMANDAP PUNARNIRMAN SAMITI

Silyan Satta, Maru

Contact No: 01-4240185

Report on:

Wood Sorting, Salvaging and Inventory Phase –I

27<sup>th</sup> – 29<sup>th</sup> Baisakh 2075

Submitted By

Ar. Binita Magaiya

17<sup>th</sup> Jestha 2075

## Background:

After the Gorkha Earthquake 2015, the wooden elements, collected from the debris from all of the temples that had collapsed were stored in many locations around Hanumandhoka Durbar Square. Among them, the two piles which had maximum wooden elements from Kasthamandap were kept in the open space in front of the Police office, Kal Bhairav and the other one was beside the Nava Yogini Daboo (Mahadev Parvati temple). After many previous attempts to secure and save the wood from the weathering and other factors failed and the risk of decay, also theft increased, it was evident that the saving of the 1000 years old wood was the top priority. Hence, an open call for volunteers was made to come together and help save the 'Kaath' of 'Kasthamandap'.

## The initiative:

Under the initiation of Kasthamandap Punarnirman Samiti, the sorting, salvaging, inventorying and storing was done. It was a three day event from 27<sup>th</sup> Baisakh 2075 till 29<sup>th</sup> Baisakh 2075. The event was jointly inaugurated by mayor of Kathmandu Municipality Mr. Bidhya Sundar Shakya and the honorable member of Parliament, also the chairperson of the organization Mr. Rajesh Shakya.

Figure 2: The initiation by Mr. Bidhya Sundar Shakya and Hon. Mr. Rajesh Shakya

### The work:

There was an open call for volunteers through the social media and many interested volunteers from all walks of life participated in this event. The local clubs, residents, students, professionals and the national army come together to help sort, inventory and store the thousand years old wood of Kasthamandap. The open call for volunteers saw more than 150 active volunteers during the three day period of the work.

Figure 3: The local clubs helping the inventory team to draw and record.

Photo Credit: Mr. Sandesh Munikar

The inventory team consisted mostly of students or architecture and architects or from the engineering background, who did all the measuring of the salvaged wood and also tried to identify if the wood was reusable or not, which part of the building it belonged to or of which monument the element belonged under the guidance and supervision of the master wood craftsmen. The non technical volunteers helped with the moving of the wood and other logistics.

### The Team:

The team consisted of 2 master craftsmen from Bhaktapur, Mr. Laxmi Prasad Rajchala, whose work experience for more than 60 years has namely the restoration of 55 Windows Palace in Bhaktapur has to his accreditation . Other numerous restoration and reconstruction of the monuments were done by him and his team. Also, along with Mr. Krishna Prasad Shilpakar, some of his works are in Bhaktapur, Dolakha, Nuwakot and Gorkha Durbar. His most accomplished work is of Joshi Agamchen , Basantapur, and Lakhe nani Chikamugal. His work experience spans 40 plus years. Both the master craftsmen had guided the technical team to identify the elements from Kasthamandap, its unique woodwork and also the joinery mechanism for all the three days of the project.

After the inspection and preliminary eye judgment of the master craftsmen, 6 Thaa (Posts), 1 Chauka, 1 Musi, 2 Nina and 4 Lakashi were found to be reusable, 6 Thaa (Post), 1 Nina could be used after repairation and 4 Thaa (Posts) needed to be replaced. 1 element was unidentified.

Also two platoons of the Nepal Army (Name), who had come for the morning 8am to 9 am shift and 12noon to 1 pm shift.

The stationeries were contributed by the Kathmandu Metropolitan City Office, Basantapur division.

The working hours were divided into two shifts, 8 am till 12 noon and from 2pm till 4 pm.

### The work days:

#### Day 1, 27<sup>th</sup> Baisakh 2075: Thursday

Day 1, was the official starting of the wood inventory and sorting process. The official opening was done jointly by Member of Parliament, State no. 3, Mr. Rajesh Shakya and Mayor of Kathmandu Metropolitan City Mr. Bidhya Sundar Shakya. A total of 47 participants were present on that day combining both morning and evening shifts. Along with the local volunteers, technical team volunteers included 5 technical volunteers of 2 Architects, 1 Architecture student and 2 Civil Engineering students. 5 Thaa (posts), 1 Chauka, 1 Nina and 1 Musi (rafters) were measured, out of which 3 Thaa can be used after repairation. 1 Thaa and 1 Nina were stored in open covered by Tarpaulins. 1 Musi is stored in shed 2, and the rest of the measured wood is stored in shed 1.

(Please see Appendix for the details of attendance, inventory detail and location map of the stored woods)

**Figure 6: Inspection of One of the four main central posts, earlier repair had sealed the damage with wood dust, glued in place with wood chunks**

Photo Credit: Mr. Sandesh Munikar

### Day 2, 28<sup>th</sup> Baisakh 2075: Friday

Day 2, a total of 38 participants were present on that day in morning shift only. Along with the local volunteers, technical team volunteers included 3 technical volunteers of 3 Architecture students. 2 Thaa (posts), 1 Nina were measured, out of which 1 Thaa (posts) can be used after repairation. All three elements were stored in open covered by Tarpaulins.

(Please see Appendix for the details of attendance, inventory detail and location map of the stored woods)

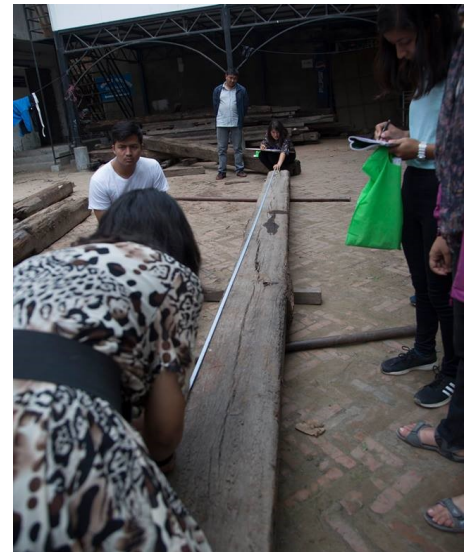

Figure 7: Measurement of Nina on progress by the technical volunteers.

Photo Credit: Mr. Sandesh Munikar

### Day 3, 29<sup>th</sup> Baisakh 2075: Saturday

Day 3, A total of 76 participants were present on that day combining both morning and evening shifts. The team of Volunteers included local volunteers, 9 members from Nepal Red Cross Society, Ganabahal Chapter, Kilagal Sanskritik pucha and technical team volunteers included 22 technical volunteers of 5 Architects, 5 Architecture students and 2 Civil Engineers. 9 Thaa (posts), 4 Lakashi, 1 Nina and 1 element (unidentified) were measured, out of which 4 Thaa need to be replaced, 3 Thaa needs repairation, 1 Nina needs repairation. 4 Lakashi and 1 Nina were stored in open covered by Tarpaulins. The rest of the measured wood is stored in shed 1.

(Please see Appendix for the details of attendance, inventory detail and location map of the stored woods)

Figure 8: The wooden elements Stacked and stored in open covered by tarpaulins

Photo Credit: Mr. Sandesh Munikar

Figure 9: The measured woods being stacked in Shed 1

Photo Credit: Mr. Sandesh Munikar

After the phase-I, by measurement of 26 elements, 15 were found to be reusable, 7 needed repair and 4 elements needed to be replaced. Hence, it is very difficult at the moment to predict the percentage of wood that could be reused, needs repair or needs to be replaced, without gathering all the pieces together.

### **The Work Ahead:**

The project was 3 day work plan to sort, inventory and save the wood kept in front of Kal Bhairav Temple, Hanumandhoka Police Office and beside the Nava Yogini Dabali (Shiva Parvati Temple). There are many other places where the wood from Kasthamandap can be reclaimed, such as Nhuchen Chowk in Gaddi Baithak and Masan Chowk in Degu Taleju, Hanumandhoka gallery museum, etc. The work of inventorying and sorting needs to be done in many phases also with a much bigger team. In order to accumulate all the remaining elements of Kasthamandap it will take much longer time and effort, hence the work although tedious should be continued to ensure the reconstruction of Kasthamandap with all its material values intact and use the salvaged materials as much as possible.

### **The Conclusion:**

It was the first phase of the wood sorting and inventorying process. Other places where the wood restored from the debris are still lying around in many locations in Hanumandhoka Durbar Square which needs to be brought together in one place and make a proper inventory with much detail as possible. This is a time consuming process in which would hopeful encourage to participate in rebuilding our lost heritage and monuments.
